***Drawings***

The drawings filed on 8/24/06 are approved by the Examiner.

***Allowable Subject Matter***

Claims 1-14 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art does not show nor fairly suggest a polarization apparatus and method which consists of a device comprising: a piezoelectric first actuator tensioned between two retaining elements of a pretensioning holder and connected via control lines with a control unit with a pretensioning force being able to be applied to the first actuator via the retaining elements, a second piezoelectric actuator arranged between the first actuator and a retaining element which is connected via second control lines to the control unit, wherein the control unit after a start phase is operable during a polarization process to supply the first and the second actuator with polarization voltages with changing amplitudes in such as way that the length changes of the two actuators generated through the polarization voltages essentially balance out.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Direct inquiry to Examiner Dougherty at (571) 272-2022.
